

Snam CEO Marco Alverà appointed first GasNaturally President

BRUSSELS, June 13th, 2017: Marco Alverà, Chief Executive Officer of Snam, has been appointed as the first President of GasNaturally, the partnership representing the European gas industry.

“I am pleased and honoured to serve as GasNaturally President,” said Mr. Alverà. *“Tackling climate challenge and improving air quality in our communities are two of the most pressing issues of our time. Natural gas can help find a solution to both.”*

“I look forward to fostering the cooperation within our industry and with the renewable energy industry to underline the crucial role that gas can play in producing electricity, heating our homes as well as in powering our transport. Modern technologies are making gas a compelling and readily available fuel to achieve EU 2030 targets and beyond.” – added Mr. Alverà.

A graduate in Philosophy and Economics from the London School of Economics, Marco Alverà has considerable experience in the natural gas business and, more generally, in the energy sector. During his career, he has held positions of increasing responsibility first at Enel, where between 2002 and 2004 he closely followed the development of the gas business of the company and the IPO of Terna, and at Eni, where between 2005 and 2015 he managed the most important domestic and international matters in the natural gas business. He was appointed CEO of Snam in April 2016.

“GasNaturally’s members and myself look forward to continuing our constructive dialogue with EU policymakers and stakeholders on the solutions needed to position gas as a pillar of a sustainable energy mix and deliver the energy transition in a way which benefits all and leaves no consumer behind” Mr. Alverà stated.
